SUMMARY

Software Architect with more than six years of experience building enterprise systems with Java and TypeScript. Specialised in microservice architectures with DDD and hexagonal architecture, design patterns and clean code, and in DevOps: CI/CD with GitLab CI and infrastructure configuration on Oracle Cloud (OCI) with high availability. At Wireless DNA I migrated an entire legacy system to microservices; previously Tech Lead at Riu Hotels & Resorts.

PROFESSIONAL EXPERIENCE

SOFTWARE ARCHITECT / TECH LEAD

Wireless DNA | Nov 2025 — Present

Responsible for the end-to-end architecture: Next.js and React on the front end, NestJS and Java on the back end, identity with Keycloak and content with Strapi.

- Migrated an entire legacy system to a microservice architecture.
- Designed services with DDD and hexagonal architecture, applying design patterns and clean code.
- Built CI/CD pipelines with GitLab CI for every service.
- Configured the OCI infrastructure and moved it to highly available instances.
- Observability with OpenTelemetry and SigNoz.
- Agentic workflows with Claude and OpenAI, custom MCP servers and skills for the team.
- Architecture documentation with Mermaid and interface design in Figma.

Technologies: Java, NestJS, Next.js, React, Keycloak, Strapi, OCI, GitLab CI, OpenTelemetry, SigNoz, MCP

WEB DESIGN AND DEVELOPMENT · FREELANCE

Antonio De Haro | 2026

End-to-end design and development of the professional website of Antonio De Haro, film composer and touring bassist, from design to production.

- Bilingual website (Spanish and English) built with Next.js and Tailwind CSS and deployed on Vercel.
- SEO and performance optimisation.

Technologies: Next.js, React, Tailwind CSS, Vercel, i18n, SEO

TECH LEAD · SENIOR BACKEND DEVELOPER

Riu Hotels & Resorts | 2022 — 2025

Led the technological transformation of riu.com: a new look and feel built on a modern architecture and advanced caching strategies.

- Designed and implemented a microservice architecture with the team.
- Cut response time of the key API endpoints by 30%.
- Mentored the new developers joining the team.

Technologies: Java 21, Spring Boot, Hibernate, Microservices, Distributed caching, OpenShift, Grafana

SOFTWARE ENGINEER · E-COMMERCE
Riu Hotels & Resorts | 2021 — 2022

Fixed issues in the legacy website and the booking flow, and integrated data from the CMS and the core.

- Migrated Java 7 code to LTS versions (8, 11, 17 and 21).

Technologies: Java, Spring Boot, REST

JUNIOR SOFTWARE ENGINEER
Arteco Consulting | 2020 — 2021

Back-end and front-end development for hospitality clients: REST APIs with Java and Spring Boot, and database design with MongoDB and Oracle.

Technologies: Java, Spring Boot, MongoDB, Oracle

TECHNICAL SKILLS

Languages: Java (8, 11, 17, 21), TypeScript, JavaScript
Architecture: DDD, Hexagonal architecture, Microservices, Design patterns, Clean code, SOLID, API First (OpenAPI), Mermaid
Back end: Spring Boot, Hibernate, NestJS, Node.js, REST
Front end and design: Next.js, React, Angular, Figma
DevOps and cloud: CI/CD, GitLab CI, Oracle Cloud (OCI), High availability, Docker, Kubernetes, OpenShift, AWS, Jenkins
Observability: OpenTelemetry, SigNoz, Grafana
Identity and content: Keycloak (SSO, OIDC), Strapi
Data and messaging: PostgreSQL, MongoDB, Oracle, Kafka, Distributed caching
Applied AI: Claude, OpenAI, Custom MCP servers, Agent Skills, Agentic workflows
Methodologies: Scrum, TDD, BDD

EDUCATION

DATA ENGINEERING
Universitat Oberta de Catalunya (UOC) | 2023 — In progress

HIGHER TECHNICAL DIPLOMA IN WEB APPLICATION DEVELOPMENT (CFGS DAW), DUAL PROGRAMME
IES Francesc de Borja Moll | 2019 — 2021

LANGUAGES

Spanish (native) · Catalan (native) · English (upper intermediate, B2)
